BRITAIN AND FRANCE AGREE

Marks Triumph of U. S. Open Door Policy

(BY A. L. BRADFORD)

WASHINGTON- (Enited Press) -America has won her fight to participate in the development of the Mosul oil field in Mesopotamia, reputed to be fabulously rich,

It was learned authoritatively today that Great Britain and France have now come forward and agreed that American oil companies shall share in the workings of the Mosul district where the British hold a

mandate.

The action on the part of the two European powers stands forth as a triumph for the American "open door" policy of equal commercial door" policy of equal commercial and economic opportunity for nationals of all countries in the man-

dated regions of the old world.

This policy, as it affects the mandated districts, was inaugurated by former President Wilson and con-tinued emphatically by President Harding and Secretary of State

While no definite agreement has as yet been concluded regarding the Mosul district, a tacit under-standing is understood to have been

NEGOTIATIONS CONTINUE Informal negotiations have been going on for some time and are continuing with a view of reaching a definite agreement among the great oil companies of the nations concerned for carrying forward the

development when the proper moment arrives. The negotiations have been delayed because of uncertain status of the Mosul region as the nationalist Turkish government of Angora

is continuing the British mandate.

Authoritative quarters here predict that when the Mosul development is launched it will prove to be one of the greatest private enter-

More Light--Better Business For the Publisher

HE more light the publisher gives the advertiser on his publication—the greater consideration he receives when it comes to placing advertising.

The facts embodied in an A. B. C. report are those which the advertiser wants to know—facts that he must know to buy space intelligently. He cannot afford the time or expense necessary to collect them either by correspondence with the publisher or by financing his own investigation.

Therefore, the uniform, easily-accessible A. B. C. form, packed with complete dependable facts, is a ready solution to the problem of how to locate the most desirable mediums with the minimum of effort and expense.

The long-established commercial rating agencies have furnished financial information for years. Banks are audited periodically. The Audit Bureau of Circulations performs a similar function by collecting and verifying circulation information for the advertiser.

Publishers subscribing to the A. B. C. standards are helping to stabilize and organize advertising in the way that, by long experience in other commercial lines, has proved to be Good Business.

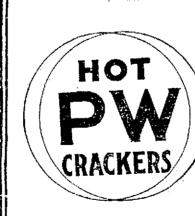

> The Lima News is a member of the A.B. C. and would be pleased to submit a copy of the latest circulation report.

If the drain of your bathroom, kitchen sink or refrigerator becomes clogged you can clear it yourself with a can of Babbitt's Lye. TAXES INCREASING

TAXPAYERS in all parts of Ohio are putting up more and more each year for the upkeep of their state, county and city governments. It is inevitable that costs mount along with the addition of systems and details made necessary as government becomes more complicated and population increases.

In Allen-co the people who leave their money at the office of the county treasurer to satisfy the demands made by the tax duplicate, are paying 394.4 per cent more taxes than they were in 1900 and 144.1 per cent more than in 1915. This is for government upkeep alone. Many persons are unable to understand why this increase is levied upon them, but when it is considered that there is a constantly growing tendency toward more detail and as city, county and state government broadens, added costs are easy to understand.

While the tendency in all departments of government is toward economy wherever possible, the headway desired is not attained. It cannot be denied that during the past seven years and longer there have been great increases in the cost of doing business by private companies. It is admitted also that generally the business of the public is not conducted with the same economy as a private concern, due to constantly changing forces, the result of the public business being made a political football the most part of the way.

Hence, it is not surprising the cost of the conduct of public business has increased amazingly. Collection of more taxes is a natural sequence. Utility companies of Ohio, which pay ten per cent of all taxes collected, are required to advance rates when their taxes are boosted. It is the old story of "Jones paying the freight."

No matter how much chatter there may be about economy in governmental affairs, it is not altogether likely that the cost of conducting the business of city, county and state can be materially reduced. Consequently, constant increases may be expected, for taxation is a thing that is restless. It is never standing still. It is either going up or down-mostly up.

SUGAR famine this year? Not unless housewives stampede A SUGAR famine this year. And amount of a hundred or so and create a shortage by stocking up with a hundred or so pounds for each family. Remember, that's what started the sugar shortage several years ago and shot the price up around 30 cents a pound.

Cuba this year will produce about 197,000 tons more sugar than last year, according to the leading sugar frade authority, Guma-Mejer. The European beet sugar crop will total nearly 400,000 tons more than in the 1921-22 season. In America we started 1923 with "wartime size" stocks of sugar in storageofficial government report. Much depends, of course, on the size of the 1922 American crop.

But Cuban sugar is the main regulator of what we pay for sugar. And the supply of Cuban sugar for this year "appears" to be practically the same as was available in 1921," says the market letter which the American Sugar Refining Co, sends to its cus-

In 1921, five to eight cents a pound was considered a good wholesale price for refined sugar here in the United States.

T'S hard to get at the truth about the sugar situation, for it's an industry of highly complicated statistics. Let's take a bit at home three weeks, but why punof unfavorable news and analyze it:

The American Sugar Refining Co. estimates that the surplus stocks of Cuban sugar around the first of the year 1923 were a cold, but Tom may be inventing 1,129,000 tons less than a year before.

Half of this decrease is counteracted by the 1922-1923 gain in Cuban and European sugar production.

And it's reasonable to expect that most of the balance will be canceled by the fact that Americans this coming summer will make less home-made wine than last summer and the one before. The enormous increase in the amount of sugar used by Americans, during the last few years, has been due mainly to homemade wines. Fifty pounds of sugar doesn't look like much to a cellar chemist. Wine making is on the wane . . . "too much trouble, not worth the fuss."

W E dig into the newspaper files and in 1920 find Edgar Wat-kins, counsel for the Southern Grocers' Association, quoted as saying: "Refinery prices for sugar the first four months of this year ranged from 11 to 18 cents a pound, while most brokers quoted them at 27 and 30 cents a pound."

As you'll recall, sugar led all other commodities when it came to speculation and exorbitant prices. During the sugar "famine," the law of supply and demand was temporarily repealed. The surest, quickest way to play into speculators' hands is to buy a lot of sugar and store it in the attic.

We do it by combating that infected Sebum in a new way - a scientific way heretofore unknown. Results are quick and amazing. And so certain that we have no fear to guarantee our method.

Why Your Hair Lacks Life

Sebum is an oil that forms at the follicles of the hair. Its natural function is to supply the hair with oil to make it soft and wavy. But, science now proves that it is also the cause of most hair troubles, Frequently it becomes infected. It cakes on the scalp; clogs the follicles and plugs them. You can see it in your hair, either in the form of dandruff or an oily excre-

SCHOOLS TURNING ATTENTION TO TRACK, BASEBALL*

TEAMS

BY MERRICK M. HILL

With present indications pointing to the fact that both Central and South high schools may have baseball and track teams, the year will be one of the best athletic eras of the local high schools.

With the close of the baskelball season, neither coach has made plans for future varsity teams. Very little demand for a varsity baseball team is found in either school, and while a number of students in either institution, are keen for brack work, Coaches Thiebert and Burdelte assert that it is folly to start a track squad, with but one or two meets

Contral, however, is planning to form a school diamond league, which will be made up of six teams. These will simply be picked teams and will be chosen so as to be as nearly equal in strength as possible. This league will play out a regular

schedule. South is undecided as to haseball, If, however, Coach Burdette should form a varsity nine, a series would be arranged between the two schools.

In both schools, students are anxious to be represented in track events. Coach Thiebert, of Central, stated Tuesday morning that if three or four meets could be arranged, he would start training at once. In event that Central develops good material. Thiobert asserted he would Six" meet in Columbus, late in the spring.

Coach Burdette, of South, has made no plans regarding track work. but stated that he is more than willing to train a track team, in event several meets can be arranged.

In connection with work on its new reparations proposals, it is learned that the government also is preparing an unprecedented and far reaching scheme to stabilize the mark and promote general sanity in German finance.

An advantage to Chancellor Cund in early negotiations would be that at present no link of the three fold resistance of government industrialists and workers had cracked. He would be in a far stronger position with this unity at his back, than if there was dissension in the German ranks as might threaten to develop if the Ruhr occuration became more ranks as might threaten to develop if the Ruhr occupation became more

House, Lima, writes the following: and a most surprised look on her face.

One of our party was highly nerto call a doctor. After ringing up, he up as this person would become hysterical with mirth, thus demoralizing the others." Come as quick as you can, my wife broke her leg half way up between Spring and High-sts."

Mrs. Nellie W. Benson, 1131 W. Adabell, a coceanut. Adabelt thought it rather queer that her daddy would send her a coceanut and the next day she said. Mother, farm, I saw this happen, at harvest 1 know why father sent me the co-time. My brother employed quite a count. He didn't have time to few men, all hearty eaters and we have his picture taken and the cowere all sented around the table just sent it instead." and my brother started to bless the food. He only had said a few words and stopped and said 'Amen!' He then grabbed for the meat platter. After the men had gone tasked him why he hadn't finished giving thanks. He said, Sister, if I had gone on and finished, there wouldn't have been a thing for me to say the blessing for. Safety first is my motto. From now on I shall eat and then give thanks."

The most humorous situation I was ever connected with occurred at a certain Sunday school convention, writes Mrs. Elmer Smale, 218 N. Shawnee-st, held each year in a large grove and in which the different schools competed in songs and recitations. We were well drilled

How to Make Pine Cough Syrup at Home

Has no equal for prompt results.
Takes but a moment to prepare,
and saves you about \$2.

Pine is used in nearly all prescrip-

Pine is used in nearly all prescriptions and remedies for coughs. The reason is that pine contains several elements that have a remarkable effect in southing and healing the membranes of the throat and chest.

Pine cough syrups are combinations of pine and syrup. The "syrup" part is usually plain sugar syrup.

To make the best pine enugh remedy that money can biry, put 2½ ounces of Pinex in a pint hottle, and fill up with home-made sugar syrup. Or you can use clarified molasses, honey, or corn syrup, instead of sugar syrup. Either way, you make a full pint—more than you can buy ready-made for three times the money. It is pure, good and tastes very pleasant.

You can feel this take hold of a cough or cold in a way that means business. The cough may be dry, hearse and tight, or may be persistently loose from the formation of phlegm. The cause is the same—inflamed membranes—and this Pinex and Syrup combination will stop is—usually in 24 hours or less. Splendid, too, for bronchial asthma, hearseness, or any ordinary throat ailment.

Pinex is a highly concentrated compound of gennine Norway pine extract, and is famous the world over for its prompt effect upon coughs.

Beware of substitutes. Ask your druggist for "2½ ounces of Pinex" with directions, and don't accept anything else. Genranteed to give absolute satisfaction or money refunded. The Pinex Co., Ft. Wayne, Ind.
